

## Correction to “Stressors and perceived consequences of the COVID-19 pandemic among older adults: a cross-sectional study using data from the Canadian Longitudinal Study on Aging”

*CMAJ Open* has been made aware of an error that occurred in an article published on Aug. 9, 2022.<sup>1</sup>

In the results section of the abstract, the frequency of participants who reported negative perceived consequences was erroneously reported. This should have read, “Of the 23 020 participants who reported on their perceptions of the consequences of the pandemic, 14 520 (63.1%) participants perceived the consequences to be negative.”

The article has been corrected at [cmajopen.ca](http://cmajopen.ca).
