

Supplemental Table 3. Quantitative outcomes measured for well-being domains^{1,2}

Social Well-being N=17 (26%)		Mental Well-being N=6 (9%)		Physical Well-being N=1 (2%)		Intellectual Well-being N=51 (78%)		Occupational Well-being N=32 (49%)	
Outcome	N (%) ³	Outcome	N (%) ³	Outcome	N (%) ³	Outcome	N (%) ³	Outcome	N (%) ³
Agreement	7 (41%)	Anxiety symptoms	1 (17%)	Compliance	1 (100%)	Anxiety symptoms	1 (2%)	Agreement	5 (16%)
Behavior	1 (6%)	Experience	4 (57%)			Agreement	12 (23%)	Attitudes	3 (9%)
Competence	1 (6%)	Implicit association	1 (17%)			Attitudes	8 (16%)	Compliance	3 (9%)
Confidence	3 (18%)	Quality of life	1 (17%)			Compliance	4 (8%)	Competence	2 (6%)
Content	1 (6%)	Satisfaction	1 (17%)			Competence	4 (8%)	Confidence	2 (6%)
Experience	3 (18%)	Skills	2 (33%)			Confidence	6 (12%)	Duties	1 (3%)
Knowledge	3 (18%)	Stressors	1 (17%)			Content	3 (6%)	Experience	8 (25%)
Learning	3 (18%)					Duties	1 (2%)	Goals	1 (3%)
Perceptions	3 (18%)					Experience	10 (20%)	Interest	2 (6%)
Preparedness	6 (35%)					Goals	12 (23%)	Performance	14 (44%)
Reaction	1 (6%)					Interest	23 (45%)	Preparedness	7 (22%)
Satisfaction	6 (35%)					Knowledge	12 (23%)	Satisfaction	2 (6%)
Skills	1 (6%)					Perceptions	12 (23%)	Skills	2 (6%)
Willingness	10 (59%)					Performance	5 (10%)	Usefulness	2 (6%)
	2 (12%)					Preparedness	1 (2%)		2 (6%)
	1 (6%)					Quality of intervention	1 (2%)		2 (6%)
						Quality of life	1 (2%)		8 (25%)
						Quality of life	12 (23%)		3 (9%)
						Satisfaction	1 (2%)		1 (3%)
						Skills	1 (2%)		
						Usefulness	1 (2%)		
						Willingness	1 (2%)		
							16 (31%)		
							5 (10%)		
							1 (2%)		
							1 (2%)		

¹Social, mental, physical, intellectual and/or occupational well-being [Supplemental Table 3]

²More than one outcome measure was often reported in a single study for each well-being domain

³N, number of studies that reported each outcome; %, N as a proportion of studies for that domain
