

Appendix 4 (as supplied by authors).

Supplemental Table: Characteristics of respondent organizations, comparing those with 100% complete responses versus those with 85-99% complete responses.

Organization features	Statistics	
	Organizations with complete ⁺ survey response (n=118)	Organizations with at least one missing survey response (n=23)
Organization Type		
Family health team	51 (43.22 %)	11 (47.83 %)
Community health centre	51 (43.22 %)	10 (43.48 %)
Nurse practitioner-led clinic	10 (8.48 %)	0 (0.0 %)
Aboriginal health access centre	3 (2.54 %)	0 (0.0 %)
Missing	3 (2.54 %)	2 (8.70 %)
Organization Affiliations		
Academic and teaching centre	32 (27.12 %)	4 (17.39 %)
Teaching centre Only	43 (36.44 %)	7 (43.48 %)
Non-teaching centre	40 (33.90 %)	10 (30.43 %)
Missing	3 (2.54 %)	2 (8.70 %)
Organization Location		
Urban	65 (55.08 %)	12 (52.17 %)
Rural	43 (36.44%)	8 (34.78 %)
Other	8 (6.78 %)	1 (4.35 %)
Missing	2 (1.69 %)	2 (8.70 %)
Years Organization in Operation*	11 (16.75) [6.78%]	11 (16.5) [17.39%]
Number of Patients Served*	8,000 (11,950) [5.08%]	11,000 (14,100) [13.04%]
Number of Primary Care Providers*	10 (10) [4.24%]	11.5 (11.25) [13.04%]
Number of Interprofessional Staff*	15.5 (18.25) [6.38%]	12 (18.24) [13.04 %]
Ratio of Patients to Staff*	320 (314.29) [7.63%]	361 (464.4) [13.04 %]

*median (IQR) [%missing]

⁺Complete means survey respondents that provided responses to all questions in the survey
