Standards for Reporting Qualitative Research (SRQR)*

	rage(s)
Title and abstract	
Title - Concise description of the nature and topic of the study identifying the study as qualitative or indicating the approach (e.g., ethnography, grounded theory) or data collection methods (e.g., interview, focus group) is recommended	P1
Abstract - Summary of key elements of the study using the abstract format of the intended publication; typically includes background, purpose, methods, results, and conclusions	P2

Introduction

Problem formulation - Description and significance of the problem/phenomenon	P3, paragraph 1
studied; review of relevant theory and empirical work; problem statement	
Purpose or research question - Purpose of the study and specific objectives or	P3, paragraph 3
questions	

Methods

Qualitative approach and research paradigm - Qualitative approach (e.g.	P3, study design
ethnography, grounded theory, case study, phenomenology, narrative research)	and setting
and guiding theory if appropriate; identifying the research paradigm (e.g.	
postpositivist, constructivist/interpretivist) is also recommended; rationale	
Researcher characteristics and reflexivity - Researchers' characteristics that may	P4, data
influence the research, including personal attributes, qualifications/experience,	collection
relationship with participants, assumptions, and/or presuppositions; potential or	
actual interaction between researchers' characteristics and the research	
questions, approach, methods, results, and/or transferability	
Context - Setting/site and salient contextual factors; rationale	P3, study design
	and setting
Sampling strategy - How and why research participants, documents, or events	P4, participants
were selected; criteria for deciding when no further sampling was necessary (e.g.,	
sampling saturation); rationale	
Ethical issues pertaining to human subjects - Documentation of approval by an	P4, participants
appropriate ethics review board and participant consent, or explanation for lack	P5, ethics
thereof; other confidentiality and data security issues	approval
Data collection methods - Types of data collected; details of data collection	P4, paragraph 1
procedures including (as appropriate) start and stop dates of data collection and	
analysis, iterative process, triangulation of sources/methods, and modification of	
procedures in response to evolving study findings; rationale	
Data collection instruments and technologies - Description of instruments (e.g.,	P4, data
interview guides, questionnaires) and devices (e.g., audio recorders) used for data	collection;
collection; if/how the instrument(s) changed over the course of the study	supplemental
	document
Units of study - Number and relevant characteristics of participants, documents,	P5, results,
or events included in the study; level of participation (could be reported in results)	paragraph 1

Page(s)

Data processing - Methods for processing data prior to and during analysis,	P5, data analysis
including transcription, data entry, data management and security, verification of	
data integrity, data coding, and anonymization/de-identification of excerpts	
Data analysis - Process by which inferences, themes, etc., were identified and	P5, data analysis
developed, including the researchers involved in data analysis; usually references a	
specific paradigm or approach; rationale	
Techniques to enhance trustworthiness - Techniques to enhance trustworthiness	P4, data
and credibility of data analysis (e.g., member checking, audit trail, triangulation);	collection,
rationale	paragraph 2

Results/findings

Synthesis and interpretation - Main findings (e.g., interpretations, inferences, and themes); might include development of a theory or model, or integration with prior research or theory	P5 to 11
Links to empirical data - Evidence (e.g., quotes, field notes, text excerpts, photographs) to substantiate analytic findings	P5 to 11

Discussion

Integration with prior work, implications, transferability, and contributions(s) to	P10 to P13
the field - Short summary of main findings; explanation of how findings and	
conclusions connect to, support, elaborate on, or challenge conclusions of earlier	
scholarship; discussion of scope of application/generalizability; identification of	
unique contributions(s) to scholarship in a discipline or field	
Limitations - Trustworthiness and limitations of findings	P13,
	limitations

Other

Conflicts of interest - Potential sources of influence or perceived influence on study	Page 1
conduct and conclusions; how these were managed	
Funding - Sources of funding and other support; role of funders in data collection,	Page 1
interpretation, and reporting	

*The aims of the SRQR is to provide transparency in all aspects of qualitative research by providing guidelines for reporting qualitative research
